## Table of Contents

Copyright	<a href="#">C</a>
Dedication	<a href="#">C</a>
Letter from (ISC)2 Executive Director W. Hord Tipton	<a href="#">C</a>
Preface	<a href="#">C</a>
Acknowledgments	<a href="#">C</a>
About the Authors	<a href="#">C</a>
<b>Part ONE: The Need for Information Security</b>	<a href="#">C</a>
<b>Chapter 1. Information Systems Security</b>	<a href="#">C</a>
Information Systems Security	
Tenets of Information Systems Security	
The Seven Domains of a Typical IT Infrastructure	
Weakest Link in the Security of an IT Infrastructure	
IT Security Policy Framework	
Data Classification Standards	

---

CHAPTER SUMMARY

---

KEY CONCEPTS AND TERMS

---

CHAPTER 1 ASSESSMENT

---

**Chapter 2. Changing How People and Businesses Communicate**

---

Evolution of Voice Communications

---

VoIP and SIP Risks, Threats, and Vulnerabilities

---

Converting to a TCP/IP World

---

Multimodal Communications

---

Evolution from Brick-and-Mortar to e-Commerce

---

Why Businesses Today Need an Internet Marketing Strategy

---

The Web Effect on People, Businesses, and Other Organizations

---

CHAPTER SUMMARY

---

KEY CONCEPTS AND TERMS

---

CHAPTER 2 ASSESSMENT

---

**Chapter 3. Malicious Attacks, Threats, and Vulnerabilities**

---

Malicious Activity on the Rise

---

What Are You Trying to Protect?

---

Whom Are You Trying to Catch?

---

Attack Tools

---

What Is a Security Breach?

---

What Are Vulnerabilities and Threats?

---

What Is a Malicious Attack?

---

What Is Malicious Software?

---

What Are Countermeasures?

---

CHAPTER SUMMARY

---

KEY CONCEPTS AND TERMS

---

CHAPTER 3 ASSESSMENT

---

**Chapter 4. The Drivers of the Information Security Business**

---

Defining Risk Management

---

Implementing a BIA, a BCP, and a DRP

---

Assessing Risks, Threats, and Vulnerabilities

---

Closing the Information Security Gap

---

Adhering to Compliance Laws

---

Keeping Private Data Confidential

---

---

CHAPTER SUMMARY

---

KEY CONCEPTS AND TERMS

---

CHAPTER 4 ASSESSMENT

---

---

**Part TWO: The Systems Security Certifies Practitioner (SSCP®) Professional Certification from (ISC)2**

---

**Chapter 5. Access Controls**

---

The Four Parts of Access Control

---

The Two Types of Access Control

---

Defining an Authorization Policy

---

Identification Methods and Guidelines

---

Authentication Processes and Requirements

---

Accountability Policies and Procedures

---

Formal Models of Access Control

---

Threats to Access Controls

---

Effects of Access Control Violations

---

Centralized and Decentralized Access Control

---

CHAPTER SUMMARY

---

KEY CONCEPTS AND TERMS

---

CHAPTER 5 ASSESSMENT

---

**Chapter 6. Security Operations and Administration**

---

Security Administration

---

Compliance

---

Professional Ethics

---

The Infrastructure for an IT Security Policy

---

Data Classification Standards

---

Configuration Management

---

The Change Management Process

---

The System Life Cycle (SLC) and System Development Life Cycle (SDLC)

---

Software Development and Security

---

CHAPTER SUMMARY

---

KEY CONCEPTS AND TERMS

---

CHAPTER 6 ASSESSMENT

---

**Chapter 7. Auditing, Testing, and Monitoring**

---

Security Auditing and Analysis

---

---

Defining Your Audit Plan

---

Auditing Benchmarks

---

Audit Data–Collection Methods

---

Post-Audit Activities

---

Security Monitoring

---

Types of Log Information to Capture

---

How to Verify Security Controls

---

Monitoring and Testing Security Systems

---

CHAPTER SUMMARY

---

KEY CONCEPTS AND TERMS

---

CHAPTER 7 ASSESSMENT

---

## **Chapter 8. Risk, Response, and Recovery**

---

Risk Management and Information Security

---

The Process of Risk Management

---

Risk Analysis

---

Two Approaches: Quantitative and Qualitative

---

Developing a Strategy for Dealing with Risk

---

Evaluating Countermeasures

---

Controls and Their Place in the Security Life Cycle

---

Planning to Survive

---

Backing Up Data and Applications

---

Steps to Take in Handling an Incident

---

Recovery from a Disaster

---

Primary Steps to Disaster Recovery

---

CHAPTER SUMMARY

---

KEY CONCEPTS AND TERMS

---

CHAPTER 8 ASSESSMENT

---

## **Chapter 9. Cryptography**

---

What Is Cryptography?

---

Business and Security Requirements for Cryptography

---

Cryptographic Applications and Uses in Information System Security

---

Cryptographic Principles, Concepts, and Terminology

---

Cryptographic Applications, Tools, and Resources

---

Principles of Certificates and Key Management

---

---

CHAPTER SUMMARY

---

KEY CONCEPTS AND TERMS

---

CHAPTER 9 ASSESSMENT

---

**Chapter 10. Networks and Telecommunications**

---

The Open Systems Interconnection Reference Model

---

The Two Types of Networks

---

TCP/IP and How It Works

---

Network Security Risks

---

Basic Network Security Defense Tools

---

Wireless Networks

---

CHAPTER SUMMARY

---

KEY CONCEPTS AND TERMS

---

CHAPTER 10 ASSESSMENT

---

**Chapter 11. Malicious Code and Activity**

---

Characteristics, Architecture, and Operations of Malicious Software

---

The Main Types of Malware

---

A Brief History of Malicious Code Threats

---

Threats to Business Organizations

---

Anatomy of an Attack

---

Attack Prevention Tools and Techniques

---

Incident Detection Tools and Techniques

---

CHAPTER SUMMARY

---

KEY CONCEPTS AND TERMS

---

CHAPTER 11 ASSESSMENT

---

**Part THREE: Information Security Standards, Education, Certifications, and Laws**

---

**Chapter 12. Information Security Standards**

---

Standards Organizations

---

ISO 17799

---

ISO/IEC 27002

---

PCI DSS

---

CHAPTER SUMMARY

---

KEY CONCEPTS AND TERMS

---

CHAPTER 12 ASSESSMENT

---

**Chapter 13. Information Security Education and Training**

C

---

Self-Study

---

Adult Continuing Education Programs

---

Post-Secondary Degree Programs

---

Information Security Training Programs

---

CHAPTER SUMMARY

---

KEY CONCEPTS AND TERMS

---

CHAPTER 13 ASSESSMENT

**Chapter 14. Information Security Professional Certifications**

C

---

Vendor-Neutral Professional Certifications

---

Vendor-Specific Professional Certifications

---

DoD/Military—8570.01

---

CHAPTER SUMMARY

---

KEY CONCEPTS AND TERMS

---

CHAPTER 14 ASSESSMENT

**Chapter 15. U.S. Compliance Laws**

C

---

Compliance and the Law

---

The Federal Information Security Management Act

---

The Health Insurance Portability and Accountability Act

---

The Gramm-Leach-Bliley Act

---

The Sarbanes-Oxley Act

---

The Family Educational Rights and Privacy Act

---

The Children's Internet Protection Act

---

Making Sense of Laws for Information Security Compliance

---

CHAPTER SUMMARY

---

KEY CONCEPTS AND TERMS

---

CHAPTER 15 ASSESSMENT

---

## Table of Contents

---

[Copyright](#)

---

[List of Figures](#)

---

[Preface](#)

---

[Acknowledgments](#)

---

[About the Authors](#)

---

### Part I: History

---

#### Chapter 1. Introduction

---

[Section 1.1. The Standard Rubric](#)

---

[Section 1.2. The Matrix](#)

---

[Section 1.3. Other Views](#)

---

[Section 1.4. Safe States and the Access Control Matrix](#)

---

[Section 1.5. Other Hard Questions](#)

---

[Section 1.6. The Take-Home Message](#)

---

Section 1.7. Project Ideas

---

## **Chapter 2. The Old Testament**

---

Section 2.1. The Basic Framework

---

Section 2.2. Security Models

---

Section 2.3. The Orange Book

---

Section 2.4. INFOSEC, OPSEC, JOBSEC

---

Section 2.5. The Take-Home Message

---

Section 2.6. Project Ideas

---

## **Chapter 3. Old Principles, New World**

---

Section 3.1. Solving the Wrong Problem?

---

Section 3.2. Lack of Follow-Through?

---

Section 3.3. Too Unwieldy?

---

Section 3.4. Saltzer and Schroeder

---

Section 3.5. Modern Relevance

---

Section 3.6. The Take-Home Message

---

Section 3.7. Project Ideas

---

## **Part II: Security and the Modern Computing Landscape**

---

### **Chapter 4. OS Security**

---

#### **Section 4.1. OS Background**

---

Section 4.1.1. Computer Architecture

---

Section 4.2. OS Security Primitives and Principles

---

Section 4.3. Real OSes: Everything but the Kitchen Sink

---

Section 4.4. When the Foundation Cracks

---

#### **Section 4.5. Where Are We?**

---

Section 4.5.1. Windows Versus Linux

---

Section 4.6. The Take-Home Message

---

Section 4.7. Project Ideas

---

### **Chapter 5. Network Security**

---

#### **Section 5.1. Basic Framework**

---

Section 5.1.6. Enterprise Network Architecture

---

Section 5.2. Protocols

---

Section 5.3. The Network as a Battlefield

---

**Section 5.4. The Brave New World**

---

Section 5.4.1. WLANs

---

Section 5.5. The Take-Home Message

---

Section 5.6. Project Ideas

---

**Chapter 6. Implementation Security**

---

Section 6.1. Buffer Overflow

---

Section 6.2. Argument Validation and Other Mishaps

---

Section 6.3. TOCTOU

---

**Section 6.4. Malware**

---

Section 6.4.2. Notable Examples

---

Section 6.5. Programming Language Security

---

Section 6.6. Security in the Development Lifecycle

---

Section 6.7. The Take-Home Message

---

Section 6.8. Project Ideas

---

**Part III: Building Blocks for Secure Systems**

---

**Chapter 7. Using Cryptography**

---

Section 7.1. Framework and Terminology

---

Section 7.2. Randomness

---

**Section 7.3. Symmetric Cryptography**

---

Section 7.3.1. Information Theory

---

Section 7.3.2. Stream Ciphers versus Block Ciphers

---

Section 7.4. Applications of Symmetric Cryptography

---

Section 7.5. Public-Key Cryptography

---

**Section 7.6. Hash Functions**

---

Section 7.6.3. Basic Application Techniques

---

Section 7.7. Practical Issues: Public Key

---

Section 7.8. Past and Future

---

Section 7.9. The Take-Home Message

---

Section 7.10. Project Ideas

---

**Chapter 8. Subverting Cryptography**

---

Section 8.1. Breaking Symmetric Key without Brute Force

---

Section 8.2. Breaking Symmetric Key with Brute Force

---

---

Section 8.3. Breaking Public Key without Factoring

---

Section 8.4. Breaking Cryptography via the Real World

---

Section 8.5. The Potential of Efficiently Factoring Moduli

---

Section 8.6. The Take-Home Message

---

Section 8.7. Project Ideas

---

## **Chapter 9. Authentication**

---

Section 9.1. Basic Framework

---

Section 9.2. Authenticating Humans

---

Section 9.3. Human Factors

---

Section 9.4. From the Machine's Point of View

---

### **Section 9.5. Advanced Approaches**

---

Section 9.5.3. Mutual Authentication

---

Section 9.5.5. Elements to Look For

---

Section 9.6. Case Studies

---

Section 9.7. Broader Issues

---

Section 9.8. The Take-Home Message

---

Section 9.9. Project Ideas

---

## **Chapter 10. Public Key Infrastructure**

---

Section 10.1. Basic Definitions

---

Section 10.2. Basic Structure

---

Section 10.3. Complexity Arrives

---

Section 10.4. Multiple CAs

---

Section 10.5. Revocation

---

Section 10.6. The X.509 World

---

Section 10.7. Dissent

---

### **Section 10.8. Ongoing Trouble**

---

Section 10.8.2. Expression of Trust Flow

---

Section 10.9. The Take-Home Message

---

Section 10.10. Project Ideas

---

## **Chapter 11. Standards, Compliance, and Testing**

---

Section 11.1. Standards

---

Section 11.2. Policy Compliance

---

Section 11.3. Testing

---

---

Section 11.4. The Take-Home Message

---

Section 11.5. Project Ideas

---

## **Part IV: Applications**

---

### **Chapter 12. The Web and Security**

---

Section 12.1. Basic Structure

---

Section 12.2. Security Techniques

---

#### **Section 12.3. Privacy Issues**

---

Section 12.3.1. Client-Side Issues

---

Section 12.4. Web Services

---

Section 12.5. The Take-Home Message

---

Section 12.6. Project Ideas

---

### **Chapter 13. Office Tools and Security**

---

Section 13.1. Word

---

Section 13.2. Lotus 1-2-3

---

#### **Section 13.3. PDF**

---

Section 13.3.1. Relics

---

#### **Section 13.4. Cut-and-Paste**

---

Acrobat, emacs, and LaTeX.

---

Section 13.5. PKI and Office Tools

---

Section 13.6. Mental Models

---

Section 13.7. The Take-Home Message

---

Section 13.8. Project Ideas

---

### **Chapter 14. Money, Time, Property**

---

Section 14.1. Money

---

Section 14.2. Time

---

Section 14.3. Property

---

Section 14.4. The Take-Home Message

---

Section 14.5. Project Ideas

---

## **Part V: Emerging Tools**

---

### **Chapter 15. Formal Methods and Security**

---

Section 15.1. Specification

---

**Section 15.2. Logics**

---

Section 15.2.5. BAN Logic

---

Section 15.3. Cranking the Handle

---

Section 15.4. Case Studies

---

Section 15.5. Spinning Your Bank Account

---

Section 15.6. Limits

---

Section 15.7. The Take-Home Message

---

Section 15.8. Project Ideas

---

**Chapter 16. Hardware-Based Security**

---

Section 16.1. Data Remanence

---

Section 16.2. Attacks and Defenses

---

**Section 16.3. Tools**

---

Section 16.3.2. Cryptographic Accelerators

---

Section 16.4. Alternative Architectures

---

Section 16.5. Coming Trends

---

Section 16.6. The Take-Home Message

---

Section 16.7. Project Ideas

---

**Chapter 17. In Search of the Evil Bit**

---

Section 17.1. The AI Toolbox

---

Section 17.2. Application Taxonomy

---

**Section 17.3. Case Study**

---

Section 17.3.2. The Problem

---

Section 17.3.4. Feature Set

---

Section 17.4. Making It Real

---

Section 17.5. The Take-Home Message

---

Section 17.6. Project Ideas

---

**Chapter 18. Human Issues**

---

Section 18.1. The Last Mile

---

Section 18.2. Design Principles

---

Section 18.3. Other Human-Space Issues

---

Section 18.4. Trust

---

Section 18.5. The Take-Home Message

---

Section 18.6. Project Ideas

---

[The Take-Home Lesson](#)

[Introduction](#)

---

### Part I: Security Concepts

---

#### Chapter 1. Building a Roadmap for Securing Your Enterprise

---

[Reactive Versus Proactive Models](#)

---

[Understanding Your Enterprise](#)

---

[Risk Assessment: Evaluating Your Enterprise's Security Posture](#)

---

[Identifying Digital Assets](#)

---

Protecting Assets

---

Incident Response Policy

---

Training Users and Administrators

---

40,000-Foot Review

---

Summary

---

## **Chapter 2. The State of the Net: A World at War**

---

Hacking, Cracking, and Other Malicious Behavior

---

Governments at War

---

The State of the Government

---

The State of the Corporate Sector

---

A Warning

---

Summary

---

Additional Information

---

## **Chapter 3. Hackers and Crackers**

---

The Difference Between Hackers and Crackers

---

Tools of the Trade

---

Exploits and the SANS Top 20

---

Summary

---

## **Chapter 4. Mining the Data Monster**

---

Information Overload

---

How Much Security Do You Need?

---

General Sources

---

Mailing Lists

---

Usenet Newsgroups

---

Vendor Security Mailing Lists, Patch Depositories, and Resources

---

Summary

---

## **Chapter 5. Internal Security**

---

Internal Security: The Red-Headed Stepchild

---

Internal Risks: Types of Harm and Vectors

---

Risk Mitigation Policies

---

Products

---

Resources

---

Summary

---

**Part II: Hacking 101****Chapter 6. A Brief TCP/IP Primer**

What Is TCP/IP?

How Does TCP/IP Work?

The Individual Protocols

IPsec, IPv6, VPNs, and Looking Ahead

Summary

**Chapter 7. Spoofing Attacks**

What Is Spoofing?

Internet Security Fundamentals

The Mechanics of a Spoofing Attack

Documents Related Specifically to IP Spoofing

How Do I Prevent IP Spoofing Attacks?

Other Strange and Offbeat Spoofing Attacks

Summary

**Chapter 8. Personal Privacy**

Degrees of Exposure

Web Browsing and Invasion of Privacy

Browser Security

Your Email Address and Usenet

At Work

A Warning

**Chapter 9. Dispelling Some of the Myths**

When Can Attacks Occur?

What Kinds of Attackers Exist?

Operating Systems Used by Crackers

Is There a Typical Attack?

Who Gets Targeted Most Frequently?

What Is the Motivation Behind Attacks?

Summary

**Part III: A Defender's Toolkit****Chapter 10. Firewalls**

---

What Is a Firewall?

---

Other Features Found in Firewall Products

---

Firewalls Are Not Bulletproof

---

A Look Under the Hood of Firewalling Products

---

Programmers Bypassing the Firewall

---

Pitfalls of Firewalling

---

Firewall Appliances

---

Building Firewalls in the Real World

---

Sample Failures of Firewall Technology

---

Commercial Firewalls

---

Summary

---

## **Chapter 11. Vulnerability Assessment Tools (Scanners)**

---

The History of Vulnerability Scanners

---

How Vulnerability Scanners Work

---

What to Look For When Choosing a Scanner

---

Fundamental Shortcomings

---

Top Vulnerability Scanners

---

Other Vulnerability Scanners

---

Summary

---

## **Chapter 12. Intrusion Detection Systems**

---

An Introduction to Intrusion Detection

---

Network-Based IDSs

---

Host-Based ID Systems

---

Anomaly-Based IDSs

---

What to Look for When Choosing an IDS

---

Snort and Other Open Source IDS Solutions

---

Intrusion Detection Product Listing

---

**Summary**

---

## **Chapter 13. Logging Tools**

---

Why Log?

---

Logs from a Cracking Perspective

---

Forming a Logging Strategy

---

Network Monitoring and Data Collection

---

---

Tools for Analyzing Log Files

---

Summary

---

## **Chapter 14. Password Security**

---

An Introduction to Password Cracking

---

The Password-Cracking Process

---

The Password Crackers

---

Password Crackers for Windows

---

Unix Password Cracking

---

Cracking Cisco, Application, and Other Password Types

---

Improving Your Site's Passwords

---

Other Resources

---

Summary

---

## **Chapter 15. Sniffers**

---

Sniffers as Security Risks

---

What Level of Risk Do Sniffers Represent?

---

Has Anyone Actually Seen a Sniffer Attack?

---

What Information Do Sniffers Capture?

---

Where Is One Likely to Find a Sniffer?

---

Where Can I Get a Sniffer?

---

Defeating Sniffer Attacks

---

Summary

---

### **Further Reading on Sniffers**

---

---

## **Part IV: Weapons of Mass Destruction**

---

### **Chapter 16. Denial-of-Service Attacks**

---

What Is Denial of Service?

---

Exploitation and Denial of Service

---

Denial-of-Service Attack Index

---

Summary

---

### **Other DoS Resources**

---

### **Chapter 17. Viruses and Worms**

---

Understanding Viruses and Worms

---

---

Objects at Risk of Virus Infection

---

Who Writes Viruses, and Why?

---

Antivirus Utilities

---

Future Trends in Viral Malware

---

### **Publications and Sites**

---

Summary

---

## **Chapter 18. Trojans**

---

What Is a Trojan?

---

Where Do Trojans Come From?

---

How Often Are Trojans Really Discovered?

---

What Level of Risk Do Trojans Represent?

---

How Do I Detect a Trojan?

---

### **Resources**

---

Summary

---

## **Part V: Architecture, Platforms, and Security**

---

### **Chapter 19. Network Architecture Considerations**

---

Network Architecture

---

Protecting the Castle

---

Summary

---

### **Chapter 20. Microsoft**

---

Windows 9x and Windows Me

---

Windows NT

---

Internal Windows NT Security

---

Windows 2000

---

Windows XP

---

Modern Vulnerabilities in Microsoft Applications

---

Summary

---

### **Chapter 21. Unix**

---

A Whistle-Stop Tour of Unix History

---

Classifying Unix Distributions

---

Security Considerations in Choosing a Distribution

---

---

Unix Security Risks

---

Breaking set-uid Programs for Fun and Profit

---

Rootkits and Defenses

---

Host Network Security

---

Telnet

---

An Essential Tool: Secure Shell

---

FTP

---

The r Services

---

REXEC

---

SMTP

---

DNS

---

finger

---

SNMP

---

Network File System

---

The Caveats of chroot

---

Better the Daemon You Know...

---

Assessing Your Unix Systems for Vulnerabilities

---

Summary

---

## **Chapter 22. Novell NetWare**

---

The OS Facts of Life

---

Watching the Big Three

---

Further Reading

---

Summary

---

## **Chapter 23. Routers, Switches, and Hubs**

---

The Problems with Infrastructure Equipment

---

Keeping Up with OS Revisions

---

Securing Hubs

---

Securing Switches

---

Securing and Configuring Routers

---

Network Management Considerations

---

Preventing Spoofing and Other Packet Games

---

Summary

---

## **Further Reading and Reference**

---

**Chapter 24. Macintosh**

---

Mac OS X—Apple's New Operating System

---

Establishing the Macintosh as a Server

---

Vulnerabilities on the Macintosh Platform

---

About File Sharing and Security

---

Server Management and Security

---

Firewall Protection

---

Internal Security

---

Password Crackers and Related Utilities

---

### Part I: Laying the Foundation

---

#### Chapter 1. The World of SQL Server

---

[Section 1.1. A Great Choice](#)

---

[Section 1.2. SQL Server Database Engine](#)

---

[Section 1.3. SQL Server Services](#)

---

[Section 1.4. Business Intelligence](#)

---

[Section 1.5. UI and Tools](#)

---

Section 1.6. SQL Server Editions

---

Section 1.7. Exploring the Metadata

---

Section 1.8. What's New?

---

Section 1.9. Summary

---

## **Chapter 2. Data Architecture**

---

Section 2.1. Information Architecture Principle

---

Section 2.2. Database Objectives

---

Section 2.3. Smart Database Design

---

Section 2.4. Summary

---

## **Chapter 3. Relational Database Design**

---

Section 3.1. Database Basics

---

Section 3.2. Data Design Patterns

---

Section 3.3. Normal Forms

---

Section 3.4. Summary

---

## **Chapter 4. Installing SQL Server 2008**

---

Section 4.1. Selecting Server Hardware

---

Section 4.2. Preparing the Server

---

Section 4.3. Performing the Installation

---

Section 4.4. Upgrading from Previous Versions

---

Section 4.5. Migrating to SQL Server

---

Section 4.6. Removing SQL Server

---

Section 4.7. Summary

---

## **Chapter 5. Client Connectivity**

---

Section 5.1. Enabling Server Connectivity

---

Section 5.2. SQL Server Native Client Features

---

Section 5.3. Summary

---

## **Chapter 6. Using Management Studio**

---

Section 6.1. Organizing the Interface

---

Section 6.2. Registered Servers

---

Section 6.3. Object Explorer

---

Section 6.4. Using the Query Editor

---

Section 6.5. Using the Solution Explorer

---

Section 6.6. Jump-Starting Code with Templates

---

---

Section 6.7. Summary

---

## **Chapter 7. Scripting with PowerShell**

---

Section 7.1. Why Use PowerShell?

---

Section 7.2. Basic PowerShell

---

Section 7.3. Communicating with SQL Server

---

Section 7.4. Scripting SQL Server Tasks

---

Section 7.5. SQL Server PowerShell Extensions

---

Section 7.6. Summary

---

## **Part II: Manipulating Data with Select**

### **Chapter 8. Introducing Basic Query Flow**

---

Section 8.1. Understanding Query Flow

---

Section 8.2. From Clause Data Sources

---

Section 8.3. Where Conditions

---

Section 8.4. Columns, Stars, Aliases, and Expressions

---

Section 8.5. Ordering the Result Set

---

Section 8.6. Select Distinct

---

Section 8.7. Top ()

---

Section 8.8. Summary

---

### **Chapter 9. Data Types, Expressions, and Scalar Functions**

---

Section 9.1. Building Expressions

---

Section 9.2. Scalar Functions

---

Section 9.3. String Functions

---

Section 9.4. Soundex Functions

---

Section 9.5. Data-Type Conversion Functions

---

Section 9.6. Server Environment Information

---

Section 9.7. Summary

---

### **Chapter 10. Merging Data with Joins and Unions**

---

Section 10.1. Using Joins

---

Section 10.2. Inner Joins

---

Section 10.3. Outer Joins

---

Section 10.4. Self-Joins

---

Section 10.5. Cross (Unrestricted) Joins

---

Section 10.6. Exotic Joins

---

---

Section 10.7. Set Difference Queries

---

Section 10.8. Using Unions

---

Section 10.9. Summary

---

**Chapter 11. Including Data with Subqueries and CTEs**

---

Section 11.1. Methods and Locations

---

Section 11.2. Simple Subqueries

---

Section 11.3. Correlated Subqueries

---

Section 11.4. Relational Division

---

Section 11.5. Composable SQL

---

Section 11.6. Summary

---

**Chapter 12. Aggregating Data**

---

Section 12.1. Simple Aggregations

---

Section 12.2. Grouping within a Result Set

---

Section 12.3. Aggravating Queries

---

Section 12.4. OLAP in the Park

---

Section 12.5. Building Crosstab Queries

---

Section 12.6. Cumulative Totals (Running Sums)

---

Section 12.7. Summary

---

**Chapter 13. Windowing and Ranking**

---

Section 13.1. Windowing

---

Section 13.2. Ranking Functions

---

Section 13.3. Summary

---

**Chapter 14. Projecting Data Through Views**

---

Section 14.1. Why Use Views?

---

Section 14.2. The Basic View

---

Section 14.3. A Broader Point of View

---

Section 14.4. Locking Down the View

---

Section 14.5. Using Synonyms

---

Section 14.6. Summary

---

**Chapter 15. Modifying Data**

---

Section 15.1. Inserting Data

---

Section 15.2. Updating Data

---

Section 15.3. Deleting Data

---

Section 15.4. Merging Data

---

Section 15.5. Returning Modified Data

---

Section 15.6. Summary

---

## **Chapter 16. Modification Obstacles**

---

Section 16.1. Data Type/Length

---

Section 16.2. Primary Key Constraint and Unique Constraint

---

Section 16.3. Deleting Duplicate Rows

---

Section 16.4. Foreign Key Constraints

---

Section 16.5. Null and Default Constraints

---

Section 16.6. Check Constraints

---

Section 16.7. Instead of Triggers

---

Section 16.8. After Triggers

---

Section 16.9. Non-Updateable Views

---

Section 16.10. Views With Check Option

---

Section 16.11. Calculated Columns

---

Section 16.12. Security Constraints

---

Section 16.13. Summary

---

## **Part III: Beyond Relational**

---

### **Chapter 17. Traversing Hierarchies**

---

Section 17.1. Adjacency List Pattern

---

Section 17.2. The Materialized-Path Pattern

---

Section 17.3. Using the New HierarchyID

---

Section 17.4. Summary

---

### **Chapter 18. Manipulating XML Data**

---

Section 18.1. XML Processing in SQL Server 2008

---

Section 18.2. Sample Tables and Data

---

Section 18.3. XML Data Type

---

Section 18.4. Understanding XML Data Type Methods

---

Section 18.5. Generating XML Output Using FOR XML

---

Section 18.6. Understanding XQuery and FLWOR operations

---

Section 18.7. Understanding XQuery Functions

---

Section 18.8. Performing XML Data Modification

---

Section 18.9. Handling Namespaces

---

---

Section 18.10. Shredding XML Using OPENXML()

---

Section 18.11. XSD and XML Schema Collections

---

Section 18.12. Understanding XML Indexes

---

Section 18.13. XML Best Practices

---

Section 18.14. Summary

---

## **Chapter 19. Using Integrated Full-Text Search**

---

Section 19.1. Configuring Full-Text Search Catalogs

---

Section 19.2. Word Searches

---

Section 19.3. Advanced Search Options

---

Section 19.4. Fuzzy Searches

---

Section 19.5. Performance

---

Section 19.6. Summary

---

## **Part IV: Developing with SQL Server**

---

### **Chapter 20. Creating the Physical Database Schema**

---

Section 20.1. Designing the Physical Database Schema

---

Section 20.2. Creating the Database

---

Section 20.3. Creating Tables

---

Section 20.4. Creating Keys

---

Section 20.5. Creating User-Data Columns

---

Section 20.6. Creating Indexes

---

Section 20.7. Summary

---

### **Chapter 21. Programming with T-SQL**

---

Section 21.1. Transact-SQL Fundamentals

---

Section 21.2. Variables

---

Section 21.3. Procedural Flow

---

Section 21.4. Examining SQL Server with Code

---

Section 21.5. Temporary Tables and Table Variables

---

Section 21.6. Summary

---

### **Chapter 22. Kill the Cursor!**

---

Section 22.1. Anatomy of a Cursor

---

Section 22.2. Cursor Strategies

---

Section 22.3. Refactoring Complex-Logic Cursors

---

Section 22.4. Summary

---

---

**Chapter 23. T-SQL Error Handling**

---

Section 23.1. Legacy Error Handling

Section 23.2. Raiserror

Section 23.3. Try...Catch

Section 23.4. T-SQL Fatal Errors

Section 23.5. Summary

---

**Chapter 24. Developing Stored Procedures**

---

Section 24.1. Managing Stored Procedures

Section 24.2. Passing Data to Stored Procedures

Section 24.3. Returning Data from Stored Procedures

Section 24.4. Summary

---

**Chapter 25. Building User-Defined Functions**

---

Section 25.1. Scalar Functions

Section 25.2. Inline Table-Valued Functions

Section 25.3. Multi-Statement Table-Valued Functions

Section 25.4. Summary

---

**Chapter 26. Creating DML Triggers**

---

Section 26.1. Trigger Basics

Section 26.2. Working with the Transaction

Section 26.3. Multiple-Trigger Interaction

Section 26.4. Transaction-Aggregation Handling

Section 26.5. Summary

---

**Chapter 27. DDL Triggers**

---

Section 27.1. Managing DDL Triggers

Section 27.2. Developing DDL Triggers

Section 27.3. Summary

---

**Chapter 28. Building Out the Data Abstraction Layer**

---

Section 28.1. CRUD Stored Procedures

Section 28.2. Google-Style Search Procedure

Section 28.3. Summary

---

**Chapter 29. Dynamic SQL and Code Generation**

---

Section 29.1. Executing Dynamic SQL

---

---

Section 29.2. Preventing SQL Injection

---

Section 29.3. Summary

---

## **Part V: Data Connectivity**

---

### **Chapter 30. Bulk Operations**

---

Section 30.1. Bulk Insert

---

Section 30.2. Bulk Insert Options

---

Section 30.3. BCP

---

Section 30.4. Summary

---

### **Chapter 31. Executing Distributed Queries**

---

Section 31.1. Distributed Query Concepts

---

Section 31.2. Accessing a Local SQL Server Database

---

Section 31.3. Linking to External Data Sources

---

Section 31.4. Developing Distributed Queries

---

Section 31.5. Distributed Transactions

---

Section 31.6. Summary

---

### **Chapter 32. Programming with ADO.NET 3.5**

---

Section 32.1. An Overview of ADO.NET

---

Section 32.2. ADO.NET in Visual Studio 2008

---

Section 32.3. Application Building Basics

---

Section 32.4. Summary

---

### **Chapter 33. Sync Framework**

---

Section 33.1. Sync Framework example

---

Section 33.2. Summary

---

### **Chapter 34. LINQ**

---

Section 34.1. LINQ Overview

---

Section 34.2. LINQ to SQL

---

Section 34.3. LINQ to XML

---

Section 34.4. LINQ to DataSet

---

Section 34.5. LINQ to Entities

---

Section 34.6. Summary

---

### **Chapter 35. Asynchronous Messaging with Service Broker**

---

Section 35.1. Configuring a Message Queue

---

---

Section 35.2. Working with Conversations

---

Section 35.3. Monitoring Service Broker

---

Section 35.4. Summary

---

## **Chapter 36. Replicating Data**

---

Section 36.1. Replication Concepts

---

Section 36.2. Configuring Replication

---

Section 36.3. Summary

---

## **Chapter 37. Performing ETL with Integration Services**

---

Section 37.1. Design Environment

---

Section 37.2. Integration Services Package Elements

---

Section 37.3. Maintainable and Manageable Packages

---

Section 37.4. Deploying Packages

---

Section 37.5. Summary

---

## **Chapter 38. Access as a Front End to SQL Server**

---

Section 38.1. Access–SQL Server Use Case Scenarios

---

Section 38.2. Migrating from Access to SQL Server

---

Section 38.3. Designing Your Access Front End

---

Section 38.4. Connecting to SQL Server

---

Section 38.5. Monitoring and Troubleshooting

---

Section 38.6. Ad Hoc Querying and Reporting

---

Section 38.7. Summary

---

## **Part VI: Enterprise Data Management**

---

### **Chapter 39. Configuring SQL Server**

---

Section 39.1. Setting the Options

---

Section 39.2. Configuration Options

---

Section 39.3. Summary

---

### **Chapter 40. Policy-Based Management**

---

Section 40.1. Defining Policies

---

Section 40.2. Evaluating Policies

---

Section 40.3. Summary

---

### **Chapter 41. Recovery Planning**

---

Section 41.1. Recovery Concepts

---

---

Section 41.2. Recovery Models

---

Section 41.3. Backing Up the Database

---

Section 41.4. Working with the Transaction Log

---

Section 41.5. Recovery Operations

---

Section 41.6. System Databases Recovery

---

Section 41.7. Performing a Complete Recovery

---

Section 41.8. Summary

---

## **Chapter 42. Maintaining the Database**

---

Section 42.1. DBCC Commands

---

Section 42.2. Managing Database Maintenance

---

Section 42.3. Summary

---

## **Chapter 43. Automating Database Maintenance with SQL Server Agent**

---

Section 43.1. Setting Up SQL Server Agent

---

Section 43.2. Understanding Alerts, Operators, and Jobs

---

Section 43.3. Managing Operators

---

Section 43.4. Managing Alerts

---

Section 43.5. Managing Jobs

---

Section 43.6. Database Mail

---

Section 43.7. Summary

---

## **Chapter 44. Transferring Databases**

---

Section 44.1. Copy Database Wizard

---

Section 44.2. Working with SQL Script

---

Section 44.3. Detaching and Attaching

---

Section 44.4. Import and Export Wizard

---

Section 44.5. Summary

---

## **Chapter 45. Database Snapshots**

---

Section 45.1. How Database Snapshots Work

---

Section 45.2. Creating a Database Snapshot

---

Section 45.3. Using Your Database Snapshots

---

Section 45.4. Performance Considerations and Best Practices

---

Section 45.5. Summary

---

## **Chapter 46. Log Shipping**

---

Section 46.1. Availability Testing

---

---

Section 46.2. Warm Standby Availability

---

Section 46.3. Defining Log Shipping

---

Section 46.4. Checking Log Shipping Configuration

---

Section 46.5. Monitoring Log Shipping

---

Section 46.6. Modifying or Removing Log Shipping

---

Section 46.7. Switching Roles

---

Section 46.8. Summary

---

## **Chapter 47. Database Mirroring**

---

Section 47.1. Database Mirroring Overview

---

Section 47.2. Defining Database Mirroring

---

Section 47.3. Checking a Database Mirroring Configuration

---

Section 47.4. Monitoring Database Mirroring

---

Section 47.5. Pausing or Removing Database Mirroring

---

Section 47.6. Role Switching

---

Section 47.7. Summary

---

## **Chapter 48. Clustering**

---

Section 48.1. SQL Server 2008 Failover Clustering Basics

---

Section 48.2. Enhancements in SQL Server 2008 Failover Clustering

---

Section 48.3. SQL Server 2008 Failover Clustering Setup

---

Section 48.4. Summary

---

## **Part VII: Security**

---

### **Chapter 49. Authenticating Principals**

---

Section 49.1. Server-Level Security

---

Section 49.2. Database-Level Security

---

Section 49.3. Windows Security

---

Section 49.4. Server Security

---

Section 49.5. Database Security

---

Section 49.6. Summary

---

### **Chapter 50. Authorizing Securables**

---

Section 50.1. Object Ownership

---

Section 50.2. Object Security

---

Section 50.3. A Sample Security Model Example

---

Section 50.4. Views and Security

---

Section 50.5. Summary

---

## **Chapter 51. Data Cryptography**

---

Section 51.1. Introduction to Cryptography

---

Section 51.2. Encrypting Data

---

Section 51.3. Transparent Data Encryption

---

Section 51.4. Summary

---

## **Chapter 52. Row-Level Security**

---

Section 52.1. The Security Table

---

Section 52.2. Assigning Permissions

---

Section 52.3. Checking Permissions

---

Section 52.4. Summary

---

## **Part VIII: Monitoring and Auditing**

---

### **Chapter 53. Data Audit Triggers**

---

Section 53.1. AutoAudit

---

Section 53.2. Auditing Complications

---

Section 53.3. Summary

---

### **Chapter 54. Schema Audit Triggers**

---

Section 54.1. SchemaAudit Table

---

Section 54.2. SchemaAudit Trigger

---

Section 54.3. Summary

---

### **Chapter 55. Performance Monitor**

---

Section 55.1. Using Performance Monitor

---

Section 55.2. Summary

---

### **Chapter 56. Tracing and Profiling**

---

Section 56.1. Running Profiler

---

Section 56.2. Using SQL Trace

---

Section 56.3. Summary

---

### **Chapter 57. Wait States**

---

Section 57.1. Observing Wait State Statistics

---

Section 57.2. Analyzing Wait States

---

Section 57.3. Summary

---

### **Chapter 58. Extended Events**

---

Section 58.1. XE Components

---

Section 58.2. XE Sessions

---

Section 58.3. Summary

---

## **Chapter 59. Change Tracking**

---

Section 59.1. Configuring Change Tracking

---

Section 59.2. Querying Change Tracking

---

Section 59.3. Change Tracking Options

---

Section 59.4. Removing Change Tracking

---

Section 59.5. Summary

---

## **Chapter 60. Change Data Capture**

---

Section 60.1. Enabling CDC

---

Section 60.2. Working with Change Data Capture

---

Section 60.3. Removing Change Data Capture

---

Section 60.4. Summary

---

## **Chapter 61. SQL Audit**

---

Section 61.1. SQL Audit Technology Overview

---

Section 61.2. Creating an Audit

---

Section 61.3. Server Audit Specifications

---

Section 61.4. Database Audit Specifications

---

Section 61.5. Viewing the Audit Trail

---

Section 61.6. Summary

---

## **Chapter 62. Management Data Warehouse**

---

Section 62.1. Configuring MDW

---

Section 62.2. The MDW Data Warehouse

---

Section 62.3. Summary

---

## **Part IX: Performance Tuning and Optimization**

---

### **Chapter 63. Interpreting Query Execution Plans**

---

Section 63.1. Viewing Query Execution Plans

---

Section 63.2. Interpreting the Query Execution Plan

---

Section 63.3. Summary

---

### **Chapter 64. Indexing Strategies**

---

Section 64.1. Zen and the Art of Indexing

---

Section 64.2. Indexing Basics

---

Section 64.3. Path of the Query

---

Section 64.4. A Comprehensive Indexing Strategy

---

Section 64.5. Specialty Indexes

---

Section 64.6. Summary

---

## **Chapter 65. Query Plan Reuse**

---

Section 65.1. Query Compiling

---

Section 65.2. Query Recompiles

---

Section 65.3. Summary

---

## **Chapter 66. Managing Transactions, Locking, and Blocking**

---

Section 66.1. The ACID Properties

---

Section 66.2. Programming Transactions

---

Section 66.3. Default Locking and Blocking Behavior

---

Section 66.4. Monitoring Locking and Blocking

---

Section 66.5. Deadlocks

---

Section 66.6. Understanding SQL Server Locking

---

Section 66.7. Transaction Isolation Levels

---

Section 66.8. Application Locks

---

Section 66.9. Application Locking Design

---

Section 66.10. Transaction-Log Architecture

---

Section 66.11. Transaction Performance Strategies

---

Section 66.12. Summary

---

## **Chapter 67. Data Compression**

---

Section 67.1. Understanding Data Compression

---

Section 67.2. Applying Data Compression

---

Section 67.3. Summary

---

## **Chapter 68. Partitioning**

---

Section 68.1. Partitioning Strategies

---

Section 68.2. Partitioned Views

---

Section 68.3. Partitioned Tables and Indexes

---

Section 68.4. Data-Driven Partitioning

---

Section 68.5. Summary

---

## **Chapter 69. Resource Governor**

---

Section 69.1. Configuring Resource Governor

---

Section 69.2. Monitoring Resource Governor

---

Section 69.3. Summary

---

## **Part X: Business Intelligence**

---

### **Chapter 70. BI Design**

---

Section 70.1. Data Warehousing

---

Section 70.2. Summary

---

### **Chapter 71. Building Multidimensional Cubes with Analysis Services**

---

Section 71.1. Analysis Services Quick Start

---

Section 71.2. Analysis Services Architecture

---

Section 71.3. Building a Database

---

Section 71.4. Dimensions

---

Section 71.5. Cubes

---

Section 71.6. Data Storage

---

Section 71.7. Data Integrity

---

Section 71.8. Summary

---

### **Chapter 72. Programming MDX Queries**

---

Section 72.1. Basic Select Query

---

Section 72.2. Advanced Select Query

---

Section 72.3. MDX Scripting

---

Section 72.4. Summary

---

### **Chapter 73. Authoring Reports with Reporting Services**

---

Section 73.1. Anatomy of a Report

---

Section 73.2. The Report Authoring Process

---

Section 73.3. Working with Data

---

Section 73.4. Designing the Report Layout

---

Section 73.5. Summary

---

### **Chapter 74. Administering Reporting Services**

---

Section 74.1. Deploying Reporting Services Reports

---

Section 74.2. Configuring Reporting Services Using Management Studio

---

Section 74.3. Configuring Reporting Services Using Report Manager

---

Section 74.4. Summary

---

**Chapter 75. Analyzing Data with Excel**

## Network Security Fundamentals

**By:** [Gert De Laet](#); [Gert Schauwers](#)

**Publisher:** Cisco Press

**Pub. Date:** September 08, 2004

**Print ISBN-10:** 1-58705-167-2

**Print ISBN-13:** 978-1-58705-167-8

**Pages in Print Edition:** 480

**Download Book** [19 Tokens]: [PDF](#)

**Subscriber Rating:**  [1 Rating] [Subscriber Reviews](#)

**My Rating:**  [REVIEW THIS BOOK](#) 

**Popular Tags:** None Yet

[ADD NOTE / TAGS](#)

## Table of Contents

---

[Copyright](#)

---

[About the Authors](#)

---

[Acknowledgments](#)

---

[Icons Used in This Book](#)

---

[Command Syntax Conventions](#)

---

[Foreword](#)

---

### **Part: I Introduction**

---

#### **Chapter 1. Network Security Overview**

---

[Defining Trust](#)

---

[Weaknesses and Vulnerabilities](#)

---

[Responsibilities for Network Security](#)

---

[Security Objectives](#)

---

[Conclusion](#)

---

Q&A

---

## **Chapter 2. Understanding Vulnerabilities—The Need for Security**

---

Risk and Vulnerability

TCP/IP Suite Weaknesses

Buffer Overflows

Spoofing Techniques

Social Engineering

Conclusion

Q&A

---

## **Chapter 3. Understanding Defenses**

---

Digital IDs

Intrusion Detection System

PC Card-Based Solutions

Physical Security

Encrypted Login

Firewalls

Reusable Passwords

Antivirus Software

Encrypted Files

Biometrics

Conclusion

Q&A

---

## **Part: II Building Blocks**

---

---

### **Chapter 4. Cryptography**

---

Cryptography versus Cryptanalysis

Modern-Day Techniques

Conclusion

Q&A

---

### **Chapter 5. Security Policies**

---

Defining a Security Policy?

Importance of a Security Policy

Development Process

Incident Handling Process

---

---

Security Wheel

---

Sample Security Policy

---

Conclusion

---

Q&A

---

## **Chapter 6. Secure Design**

---

Network Design—Principles

---

Network Design—Methodology

---

Return on Investment

---

Physical Security Issues

---

Switches and Hubs

---

Conclusion

---

Q&A

---

## **Part: III Tools and Techniques**

---

### **Chapter 7. Web Security**

---

Hardening

---

Case Study

---

Conclusion

---

Q&A

---

### **Chapter 8. Router Security**

---

Basic Router Security

---

Router Security to Protect the Network

---

CBAC

---

Case Study

---

Conclusion

---

Q&A

---

References in This Chapter

---

### **Chapter 9. Firewalls**

---

Firewall Basics

---

Different Types of Firewalls

---

Enhancements for Firewalls

---

Case Study: Placing Filtering Routers and Firewalls

---

Summary

---

Q&A

---

**Chapter 10. Intrusion Detection System Concepts**

E

---

Introduction to Intrusion Detection

---

Host-Based IDSs

---

Network-Based IDSs

---

IDS Management Communications—Monitoring the Network

---

Sensor Maintenance

---

Case Study: Deployment of IDS Sensors in the Organization and Their Typical Placement

---

Conclusion

---

Q&A

---

**Chapter 11. Remote Access**

E

---

AAA Model

---

AAA Servers

---

Lock-and-Key Feature

---

Two-Factor Identification

---

Case Study: Configuring Secure Remote Access

---

Summary

---

Q&A

---

**Chapter 12. Virtual Private Networks**

E

---

Generic Routing Encapsulation Tunnels

---

IP Security

---

VPNs with IPSec

---

Case Study: Remote Access VPN

---

Conclusion

---

Q&A

---

**Chapter 13. Public Key Infrastructure**

E

---

Public Key Distribution

---

Trusted Third Party

---

PKI Topology

---

Enrollment Procedure

---

Revocation Procedure

---

Case Study: Creating Your Own CA

---

Conclusion

---

Q&A

---

**Chapter 14. Wireless Security**

---

Different WLAN Configurations

---

What Is a WLAN?

---

How Wireless Works

---

Risks of Open Wireless Ports

---

War-Driving and War-Chalking

---

SAFE WLAN Design Techniques and Considerations

---

Case Study: Adding Wireless Solutions to a Secure Network

---

Conclusion

---

Q&A

**Chapter 15. Logging and Auditing**

---

Logging

---

SYSLOG

---

Simple Network Management Protocol

---

Remote Monitoring

---

Service Assurance Agent

---

Case Study

---

Conclusion

---

Q&A

**Part: IV Appendixes****Appendix A: SAFE Blueprint**

---

Introduction to the SAFE Blueprint

---

SAFE Blueprint: Overview of the Architecture

---

Summary

---

References in This Appendix

**Appendix B: SANS Policies**

---

SANS Overview

---

SANS Initiatives and Programs

---

Security Policy Project

---

Is It a Policy, a Standard, or a Guideline?

---

References in This Appendix

**Appendix C: NSA Guidelines**

---

Security Guides

References in This Appendix

**Appendix D: Answers to Chapter Q&A**

**D**

Chapter 1 Q&A

Chapter 2 Q&A

Chapter 3 Q&A

Chapter 4 Q&A

Chapter 5 Q&A

Chapter 6 Q&A

Chapter 7 Q&A

Chapter 8 Q&A

Chapter 9 Q&A

Chapter 10 Q&A

Chapter 11 Q&A

Chapter 12 Q&A

Chapter 13 Q&A

Chapter 14 Q&A

Chapter 15 Q&A

## Web Commerce Security Design and Development

**By:** Hadi Nahari; Ronald L. Krutz

**Publisher:** John Wiley & Sons

**Pub. Date:** April 26, 2011

**Print ISBN:** 978-0-470-62446-3

**Web ISBN:** 0-470624-46-9

**Pages in Print Edition:** 502

**Subscriber Rating:** ☆☆☆☆☆ [0 Ratings]

**My Rating:** ☆☆☆☆☆ [REVIEW THIS BOOK ★](#)

## Table of Contents

### Web Commerce Security Design and Development

Copyright

Dedication

About the Authors

About the Technical Editor

Credits

Acknowledgments

Contents

Foreword

### Introduction

How This Book Is Organized

Who Should Read This Book

Summary

### Part I: Overview of Commerce

---

**Chapter 1: Internet Era: E-Commerce**

---

Evolution of Commerce

Payment

Distributed Computing: Adding E to Commerce

Notes

---

**Chapter 2: Mobile Commerce**

---

Mobile Phone and M-Commerce

Mobile Technologies: Mosquito on Steroids

Notes

---

**Chapter 3: Important "Iilities" in Web Commerce Security**

---

Confidentiality, Integrity, and Availability

Extensibility

Fault Tolerability

Interoperability

Maintainability

Modularity

Monitorability

Operability

Portability

Predictability

Reliability

Ubiquity

Scalability

Audit Ability

Traceability

Summary

Notes

---

**Part II: E-Commerce Security**

---

---

**Chapter 4: E-Commerce Basics**

---

Why E-Commerce Security Matters

What Makes a System Secure

Risk-Driven Security

Security and Usability

---

Scalable Security

---

Securing Your Transactions

---

Notes

---

**Chapter 5: Building Blocks: Your Tools**

---

Cryptography

---

Access Control

---

System Hardening

---

Notes

---

**Chapter 6: System Components: What You Should Implement**

---

Authentication

---

Authorization

---

Privacy

---

Information Security

---

Data and Information Classification

---

System and Data Audit

---

Defense in Depth

---

Principle of Least Privilege

---

Trust

---

Isolation

---

Security Policy

---

Communications Security

---

Notes

---

**Chapter 7: Trust but Verify: Checking Security**

---

Tools to Verify Security

---

Notes

---

**Chapter 8: Threats and Attacks: What Your Adversaries Do**

---

Basic Definitions

---

Common Web Commerce Attacks

---

Notes

---

**Chapter 9: Certification: Your Assurance**

---

Certification and Accreditation

---

Standards and Related Guidance

---

Related Standards Bodies and Organizations

---

Certification Laboratories

---

The Systems Security Engineering Capability Maturity Model

---

Value of Certification

---

Certification Types

---

Summary

---

Notes

---

## **Appendix A: Computing Fundamentals**

---

Introduction

---

Hardware

---

Software

---

Summary

---

## **Appendix B: Standardization and Regulatory Bodies**

---

COBIT

---

CSA

---

ETSI

---

FIPS

---

GlobalPlatform

---

IANA

---

ISO

---

NIST

---

OASIS

---

OpenID

---

OpenSAF

---

PCI

---

SOX

---

The Open Group

---

WASC

---

Notes

---

Appendix C: Glossary of Terms

---

Appendix D: Bibliography

[Introduction](#)

C

### **Chapter 1. Cloud Computing Fundamentals**

C

[Section 1.1. What Is Cloud Computing?](#)

[Section 1.2. Essential Characteristics](#)

[Section 1.3. Architectural Influences](#)

[Section 1.4. Technological Influences](#)

[Section 1.5. Operational Influences](#)

[Section 1.6. Summary](#)

Section 1.7. Notes

---

## **Chapter 2. Cloud Computing Architecture**

---

Section 2.1. Cloud Delivery Models

---

Section 2.2. Cloud Deployment Models

---

Section 2.3. Expected Benefits

---

Section 2.4. Summary

---

Section 2.5. Notes

---

## **Chapter 3. Cloud Computing Software Security Fundamentals**

---

Section 3.1. Cloud Information Security Objectives

---

Section 3.2. Cloud Security Services

---

Section 3.3. Relevant Cloud Security Design Principles

---

Section 3.4. Secure Cloud Software Requirements

---

Section 3.5. Secure Cloud Software Testing

---

Section 3.6. Cloud Computing and Business Continuity Planning/Disaster Recovery

---

Section 3.7. Summary

---

Section 3.8. Notes

---

## **Chapter 4. Cloud Computing Risk Issues**

---

Section 4.1. The CIA Triad

---

Section 4.2. Privacy and Compliance Risks

---

Section 4.3. Threats to Infrastructure, Data, and Access Control

---

Section 4.4. Cloud Service Provider Risks

---

Section 4.5. Summary

---

Section 4.6. Notes

---

## **Chapter 5. Cloud Computing Security Challenges**

---

Section 5.1. Security Policy Implementation

---

Section 5.2. Virtualization Security Management

---

Section 5.3. Summary

---

Section 5.4. Notes

---

## **Chapter 6. Cloud Computing Security Architecture**

---

Section 6.1. Architectural Considerations

---

Section 6.2. Identity Management and Access Control

---

Section 6.3. Autonomic Security

---

Section 6.4. Summary

---

Section 6.5. Notes

**Chapter 7. Cloud Computing Life Cycle Issues**

Section 7.1. Standards

Section 7.2. Incident Response

Section 7.3. Encryption and Key Management

Section 7.4. Retirement

Section 7.5. Summary

Section 7.6. Notes

**Chapter 8. Useful Next Steps and Approaches**

Section 8.1. Getting Answers

Section 8.2. Getting Help

Section 8.3. Getting Started

Section 8.4. Parting Words

Section 8.5. Notes

Appendix A. Glossary of Terms and Acronyms
